THEORY INTO PRACTICE: DISCUSSION ON DIGITAL INCLUSION, SAFETY, AND ACCESS FOR 2SLGBTQIA+ COMMUNITIES

September 29th, 2025
2:30PM EST
Room DB 0001

ODLAN transforms organizational approaches to digital inclusion and participation. Our vision is to support Canadian 2SLGBTQIA+ communities growing and thriving in the digital age through safe, accessible, and inclusive digital spaces.

Dr. Stephanie Jonsson will be presenting on her research, focusing on how to put digital citizenship scholarship into conversation with feminist theory. She will delve into the challenges 2SLGBTQIA+ communities face with participating in the digital world and will share how her organization, the Open Digital Literacy and Access Network conducts community-based initiatives to address digital divide barriers 2SLGBTQIA+ communities experience in Canada.

This event is co-hosted by the **Center for Feminist Research (CFR)** and the **Institute for Technoscience and Society (ITS)**.
